

The NOTEBOOK

BOONTON RADIO COMPANY · ROCKAWAY, NEW JERSEY

A Division of Hewlett-Packard Company

PART I

INDEX BY SUBJECT CATEGORY

Q Measurements

<i>Title and Author</i>	<i>Issue No.</i>
The Nature of Q, <i>W. C. Moore</i>	1
The Q Standard, <i>C. L. Kang and J. E. Wachter</i>	1
Q Meter Comparison	2
A Versatile Instrument — The Q Meter, <i>L. O. Cook</i>	4
Audio Frequency Measurements Using the Coupling Unit Type 564-A	5
Circuit Effects on Q, <i>C. L. Kang</i>	8
Measurement of Dielectric Materials and Hi Q Capacitors with the Q Meter, <i>N. L. Riemenschneider</i>	8
A Standard for Q and L	12
Q Meter Techniques, <i>N. L. Riemenschneider</i>	13
Calibrating an Inductance Standard, <i>J. E. Wachter</i>	15
The RX Meter or the Q Meter?, <i>N. L. Riemenschneider</i>	16
A Q Comparator, <i>J. E. Wachter</i>	17
The Evolution of the BRC Q Meter, <i>L. O. Cook</i>	23
A New UHF Q Meter	24
Applications of the Q Comparator, <i>C. W. Quinn</i>	25
Design of A UHF Q Meter, <i>C. G. Gorss</i>	27
The BRC UHF Q Meter — A New and Versatile Tool for Industry, <i>C. W. Quinn</i>	28
Calibration of A UHF Q Meter, <i>C. G. Gorss</i>	29
External or "In Circuit" Measurements on the UHF Q Meter, <i>C. W. Quinn</i>	31

VHF Bridge Measurements

A Wide-Range VHF Impedance Meter, <i>J. H. Mennie</i>	2
Transmission Line Measurement with the RX Meter, <i>N. L. Riemenschneider</i>	3
A Coaxial Adapter for the RX Meter, <i>C. G. Gorss</i>	3

<i>Title and Author</i>	<i>Issue No.</i>
Some VHF Bridge Applications, <i>N. L. Riemenschneider</i>	6
Use of Smith Charts for Converting RX Meter Readings to VSWR and Reflection Coefficient, <i>R. Poirier</i>	10
The RX Meter or the Q Meter?, <i>N. L. Riemenschneider</i>	16
Remote Measurements with the RX Meter Em- ploying Half-Wavelength Lines, <i>R. Poirier</i> ..	17
Measurement of Voltage Sensitive Capacitors ..	22

Measurements with Signal Generator

Signal Generator and Receiver Impedance, <i>W. C. Moore</i>	3
Univerter Signal-to-Noise Ratio, <i>F. G. Marble</i> ..	3
Sweep Frequency Signal Generator Design Techniques, <i>J. H. Mennie and C. L. Kang</i> ..	5
Mechanical Design Requirements of Electronic Instruments, <i>D. S. Wahlberg</i>	6
Applications of a Sweep Signal Generator, <i>F. G. Marble</i>	7
A Method of Measuring Frequency Deviation, <i>J. E. Wachter</i>	9
Useful Concepts of Frequency Modulation, <i>W. C. Moore</i>	10
A VHF FM-AM Signal Generator System, <i>J. E. Wachter</i>	11
Glide Slope Generator Tone Signal	13
A Linear Detector for FM Deviation Measurements, <i>F. P. Montesion</i>	15
A Crystal-Controlled FM Signal Generator, <i>C. G. Gorss</i>	16
Use of Markers on Sweep Signal Generator Type 240-A	16
A Control System for an FM Signal Generator, <i>C. G. Gorss</i>	18
Signal Generator Performance, <i>H. J. Lang</i>	18

Title and Author	Issue No.
Noise Limited Receiver Sensitivity Measurement Technique, <i>J. P. VanDuyne</i>	20
A General Purpose Precision Signal Generator, <i>C. G. Gorss</i>	21
A Telemetry FM-AM Signal Generator, <i>H. J. Lang</i>	21
New Navigation Aid Test Set, <i>R. Poirier</i>	24
Typical Performance Data for the Type 225-A Signal Generator, <i>C. S. Williams</i>	25
A VHF Telemetry Signal Generator System, <i>W. J. Cerney</i>	27
A 10-500 Mc Signal Generator Power Amplifier, <i>R. Poirier</i>	28
Checking the New DME and ATC Airborne Equipment with the Navigation Aid Test Set, <i>W. J. Cerney</i>	29
New FM Stereo Modulator Type 219-A	29
A Modulator for the New FM Stereo System, <i>J. P. VanDuyne</i>	30
Design of an Improved FM-AM Signal Generator, <i>A. N. Otis</i>	31
Applications of the Signal Generator Power Amplifier, <i>C. W. Quinn</i>	32
Using the FM Stereo Modulator, <i>W. J. Cerney</i>	32
New Techniques in FM Linearity Measurements, <i>J. P. VanDuyne</i>	33
A New Unity Gain Frequency Converter, <i>R. H. Blackwell</i>	34
New Techniques in FM Fidelity Measurements, <i>R. N. Schulte</i>	34
Low Level Measurements Using the Signal Generator Power Amplifier, <i>Charles W. Quinn</i>	35
X-Y Plotting with the Types 202H and J FM-AM Signal Generators, <i>Charles W. Quinn</i>	36
New System for Calibrating DME and ATC, <i>J. E. Wachter</i>	36

Low Level RF Voltage Measurements

An RF Voltage Standard Supplies a Standard Signal at a Level of One Microvolt, <i>C. G. Gorss</i>	5
Use of the RF Voltage Standard Type 245-A, <i>W. C. Moore</i>	7
Calibration of an Instrument for Measuring Low-Level RF Voltages, <i>C. G. Gorss</i>	14
A Signal Generator Calibrator for RF Level and Percent AM, <i>R. Poirier</i>	21
Applications of the Signal Generator Calibrator, <i>J. E. Wachter</i>	22

Peak Power Measurements

Precision Peak Power Measurements with the Peak Power Calibrator, <i>G. Raymond Polen</i>	35
---	----

Semi-Conductor Measurements

Title and Author	Issue No.
Transistor Measurements with the HF-VHF Bridge, <i>G. P. McCasland</i>	19
More About Transistor Measurements with the HF-VHF Bridge, <i>G. P. McCasland</i>	20
A Transistor Test Set, <i>R. Bozer</i> and <i>J. P. VanDuyne</i>	24
Transistor Current Gain Determination with the Transistor Test Set and the RX Meter, <i>C. W. Quinn</i>	26
Diode Measurements on the Transistor Test Set Type 275-A, <i>W. J. Cerney</i>	26

Film Thickness Measurements

Determination of Metal Film Thickness, <i>A. Piip</i> ,	9
Applications of the Metal Film Gauge Type 255-A, <i>D. K. Stevens</i>	11
The Use of Standards with a Film Gauge, <i>A. Piip</i>	14
BRC Film Gauge Used to Measure Aircraft Organic Finish Thickness	15

Instrument Servicing

Replacing the Thermocouple Assembly Type 565A in the Q Meter Type 260A	1
RX Meter Bridge Trimmer Adjustment	2
Check Your Q Readings by the Delta C Method, <i>J. E. Wachter</i>	4
Service Notes for the RX Meter Type 250A, <i>B. Barth</i>	6
Calibration of the Internal Resonating Capacitor of the Q Meter, <i>S. Walters</i>	7
Correction of Low Q Reading on Q Meter Type 160A, <i>S. Walters</i>	8
Some Notes on Instrument Repair	8
RF Calibration of the Sweep Signal Generator Type 240A, <i>S. Walters</i>	9
Frequency Calibration of Q Meter Type 260A, <i>S. Walters</i>	10
Lubrication of Turret and Switch Contacts, <i>L. O. Cook</i>	11
Techniques of Signal Generator Inspection, <i>L. O. Cook</i>	12
Low-Frequency Adjustment of RX Meter Type 250A	12
Glide Slope Generator Tone Signal	13
Modification of Glide Slope Signal Generator Type 232A for Improved RF Output	18
Type 240A Series Tube Modification	22
Checking RX Meter Calibration	25
Modification of Type 265A Q Comparator for Improved Stability	26
RX Meter Null Indicator	28
Adjustment of Q Dial Lock Tension on the Type 280A	30
Modification of Type 250A for Reduced Signal Level and Increased Sensitivity	31

PART II

INDEX BY INSTRUMENT TYPE

160A/260A Q Meters

Title	Issue No.
The Nature of Q	1
The Q Standard	1
Replacing the Thermocouple Assembly Type 565A in the Q Meter Type 260A	1
Q Meter Comparison	2
A Versatile Instrument — The Q Meter	4
Check Your Q Readings by the Delta C Method	4
Audio Frequency Measurements Using the Coupling Unit Type 564A	5
Calibration of the Internal Resonating Capacitor of the Q Meter	7
Measurement of Dielectric and Hi Q Capacitors with the Q Meter	8
Correction of Low Q Reading on Q Meter Type 160A	8
Circuit Effects on Q	8
Frequency Calibration of Q Meter Type 260A	10
A Standard for Q and L	12
Q Meter Techniques	13
The RX Meter or the Q Meter	16
The Evolution of the BRC Q Meter	23

202 Series Signal Generators

Signal Generator and Receiver Impedance	3
Univertter Signal-to-Noise Ratio	3
A Method of Measuring Frequency Deviation	9
A VHF FM-AM Signal Generator System	11
A Linear Detector for FM Deviation Measurements	15
Signal Generator Performance	18
A Telemetry FM-AM Signal Generator	21
A VHF Telemetry Signal Generator System	27
Design of an Improved FM-AM Signal Generator	31
New Techniques in FM Linearity Measurements	33
A New Unity Gain Frequency Converter	34
New Techniques in FM Fidelity Measurements	34
X-Y Plotting with the Types 202H and J FM-AM Signal Generators	36

207 Series Univertters

Univertter Signal-to-Noise Ratio	3
A VHF Telemetry Signal Generator System	27
A New Unity Gain Frequency Converter	34

219A FM Stereo Modulator

New FM Stereo Modulator Type 219A	29
A Modulator for the New FM Stereo System	30
Using the FM Stereo Modulator	32

225A Signal Generator

Title	Issue No.
A General Purpose Precision Signal Generator	21
Typical Performance Data for the Type 225A Signal Generator	25

230A Signal Generator Power Amplifier

A 10-500 MC Signal Generator Power Amplifier	28
Application of the Signal Generator Power Amplifier	32
Low Level Measurements Using the Signal Generator Power Amplifier	35

232A Glide Slope Signal Generator

Glide Slope Generator Tone Signal	13
Modification of Glide Slope Signal Generator Type 232A for Improved RF Output	18

235A Navigation Aid Test Set

New Navigation Aid Test Set	24
Checking the New DME and ATC Airborne Equipment with the Navigation Aid Test Set	29

240A Sweep Signal Generator

Sweep Frequency Signal Generator Design Techniques	5
Applications of a Sweep Signal Generator.....	7
RF Calibration of the Sweep Signal Generator Type 240A	9
Use of Markers on Sweep Signal Generator Type 240A	16
Signal Generator Performance	18
Type 240A Series Tube Modification	22

245 Series Voltage Standard/ Signal Generator Calibrator

An RF Voltage Standard Supplies a Standard Signal at a Level of One Microvolt	5
Use of the RF Voltage Standard Type 245A	7
Calibration of an Instrument for Measuring Low-Level RF Voltages	14
A Signal Generator Calibrator for RF Level and Percent AM	21
Applications of the Signal Generator Calibrator	22

250A RX Meter

A Wide-Range VHF Impedance Meter	2
RX Meter Bridge Trimmer Adjustment	2
Transmission Line Measurements with the RX Meter	3

Title	Issue No.
A Coaxial Adapter for the RX Meter	3
Some VHF Bridge Applications	6
Service Notes for the RX Meter Type 250A	6
Use of Smith Charts for Converting RX Meter Readings to VSWR and Reflection Coefficient	10
Low-Frequency Adjustment of RX Meter Type 250A	12
The RX Meter or the Q Meter	16
Remote Measurements with the RX Meter Employing Half-Wavelength Lines	17
Transistor Measurements with the HF-VHF Bridge	19
More About Transistor Measurements with the HF-VHF Bridge	20
Measurement of Voltage Sensitive Capacitors ..	22
Checking RX Meter Calibration	25
RX Meter Null Indicator	28
Modification of Type 250A for Reduced Signal Level and Increased Sensitivity	31
Don't Modify Your RX Meter Yet	35

255A Metal Film Gauge

Determination of Metal Film Thickness	9
Applications of the Metal Film Gauge Type 255A	11
The Use of Standards with a Film Gauge	14
BRC Film Gauge Used to Measure Aircraft Organic Finish Thickness	15

265A Q Comparator

Title	Issue No.
A Q Comparator	17
Applications of the Q Comparator	25
Modification of Type 265A Q Comparator for Improved Stability	26

275A Transistor Test Set

A Transistor Test Set	24
Transistor Current Gain Determination with the Transistor Test Set and the RX Meter	26
Diode Measurements on the Transistor Test Set Type 275A	26

280A UHF Q Meter

A New UHF Q Meter	24
Design of a UHF Q Meter	27
The BRC UHF Q Meter — A New and Versatile Tool for Industry	28
Calibration of a UHF Q Meter	29
Adjustment of Q Dial Lock on the Type 280A	30
External or "In Circuit" Measurements on the UHF Q Meter	31

8900A/B Peak Power Calibrator

Precision Peak Power Measurements with the Peak Power Calibrator	35
---	----

8925A DME/ATC Test Set

A New System for Calibrating DME and ATC	36
--	----
